

# Scania Engines

## Level 1 Service

Atlas Copco

### Easy service and support

### No DPF = No regeneration

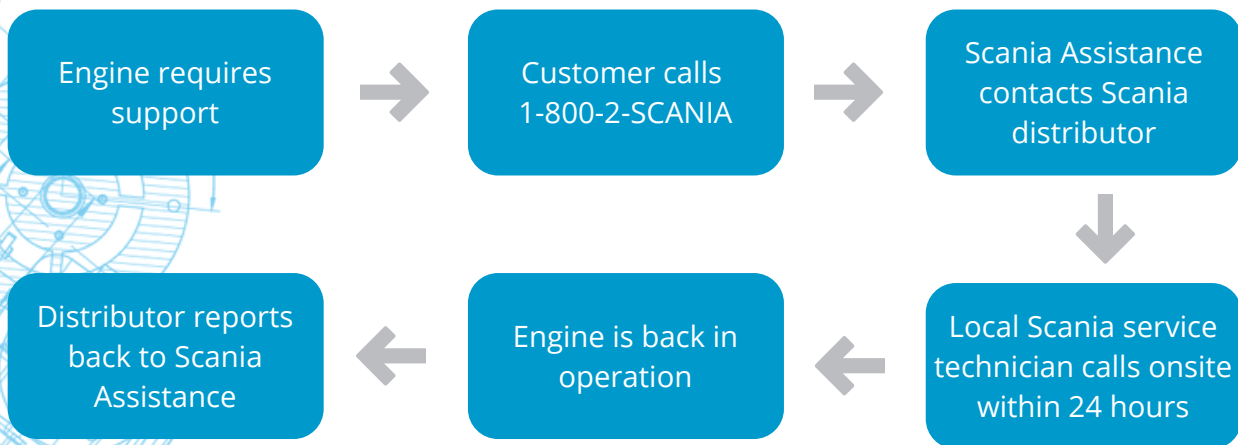

### 98% parts availability

### Scania Handshake

Scania Engines deliver power and reliability. Level One Service is defined differently from customer to customer. While Atlas Copco is responsible for the compressor and will ensure a warranty on the product, the engine is made from a separate brand and will require separate service. The engine should be registered with Scania to ensure the best outcome. Each engine includes Scania Assistance information, available 24/7/365. Scania offers support coverage and distributors over the US and Canada.

### FAQs

- **How do I contact Scania?**  
Every engine comes with Scania's service number **1-800-2-SCANIA**
- **Why is it beneficial to not use DPF?** A majority of service calls are related about an engine are related to exhaust and DEF codes. This is more sustainable, and it also cuts down on wear and tear.
- **How do I register my engine?**  
Use the [Scania page](#) to fill in the required fields under "Register Your Engine for Support".
- **There is a problem with my engine, what do I do?**  
Atlas Copco will provide a step-by-step guide on how to correctly contact help depending on the situation and location.
- **How can I contact a dealer?**
